Subject: [Does your commitment to the perceived crisis of Catastrophic Climate Change embody an agenda of population control? If so, whom of humanity will be considered expendable?](#)

Dear Mr Chalmers.

[15 minute read]

[Back on the 15th September 2024](#), I wrote to you in regard to your renewed attempt to pass the Orwellian Communications Legislation Amendment (Combating Misinformation and Disinformation) Bill 2023. And in that letter to you, I referred to my submission against that Bill.

Just to reiterate, this August 2023 submission of mine, with **KEY SEARCH TERMS ON page 5**, is available on my website at:

https://vincebarwinski.com/wp-content/uploads/2023/08/COMPLETE_submission_against_combatting_acma_misinformation_and_disinformation_bill_2023.pdf

In it, I ask the key questions of how governments globally, including yourselves, have since the outbreak of the COVID pandemic, with the interminable litany of lies your ilk have propagated, in the true spirit of the Orwellian Ministry of “Truth”, as follows;

1) “Who in the Universe are you to proclaim yourselves the **gaslighting** ultimate arbiters of truth?”

AND:

2) “To whom are you and our so-called elected and representative federal government, truly beholden? The people of Australia or unelected bureaucratic sociopaths in Geneva Switzerland [Headquarters of the World Economic Forum and WHO] and New York [Headquarters of the UN]?”

AND to which I add now:

3) “Do you wish for a global dystopian Orwellian future for your children?”

In my [September 2024 letter to you](#), I raised the most poignant story of **Marian Vagner, a World War II Polish Boy Scout Hero, who risked his life in supplying food to the [Częstohowa \(Chenstohova\) Jewish Ghetto](#) and on multiple occasions, faced the barrel of German Guns.**

Then, in that letter to you, I documented my scanning of the Freedom of Information Document detailing Marian's medical history at Melbourne's Alfred Hospital. From which I noticed that days before his ignominious and humiliating death, he was given the [dangerous drug Molnupiravir](#) – [as attested to by multiple world-renowned and brave dissident doctors](#) at a hearing chaired by US Republican Senator Ron Johnson of Wisconsin in Washington DC on Monday January 24th 2022.

To which at this point, it is most propitious for me to segue into the key question(s) pertaining to this letter as stated in the subject line. Namely, given your commitment to the perceived crisis of [Catastrophic Climate Change](#), does such a commitment ultimately embody an agenda of population control? If so, whom of humanity will be considered expendable?

To which you may ask:

“How was I prompted to ask you such ‘**outrageous**’ questions?”

In short; my somewhat cryptic answer is as follows:

“[In his own words.](#)”

Of which I shall now expand upon in depth.

To begin with, the individual I am referring to is [Dennis Lynn Meadows](#). [He was born in 1942](#) and is [emeritus professor of systems policy and social science research at the University of New Hampshire](#), where he was also director of the Institute for Policy and Social Science Research. In 2009 he received the [Japan Prize for his contributions to world peace and sustainable development](#). He has authored ten books and numerous educational games, which have been translated into more than [15 languages for use around the world](#). He earned his Ph.D. in Management from [M.I.T. \[Massachusetts Institute of Technology\]](#), where he previously served on the faculty, and has [received four honorary doctorates](#) for his contributions to environmental education.

And from the [1977 book he edited](#); *Alternatives to growth-I : a search for sustainable futures*,¹ his background is documented as follows:

“**Dennis L. Meadows**, Associate Professor of Engineering at Dartmouth [in 1977], holds a B.A. degree from Carleton College and a doctorate from [M.I.T.](#) He was director of the [Club of Rome](#) Project on the Predicament of Mankind at [M.I.T.](#) from 1970 to 1972. He has been a Research Fellow at the [East-West Population Institute in Honolulu](#) and the [International Institute for Applied Systems Analysis in Austria](#). His research and teaching focus on population-resource interactions within a finite world. He currently directs a graduate program at Dartmouth on public systems analysis and design, and consults for a number of government agencies on system analysis techniques and resource policy. His books include [The Limits to Growth](#), [Dynamics of Growth in a Finite World](#), and [Dynamics of Commodity Production Cycles](#).”

And on an [Internet archived or WayBack Machine World Economic Forum biography](#):

“Dennis Meadows
Professor Emeritus and Director, Institute for Policy and Social Science, University of New Hampshire

Member of the faculty: 1969-72, [MIT](#); 1972-88, Dartmouth College; 1988-2004, University of New Hampshire; in each institution, directed centres for policy on economic and

environmental issues. Designer of management training games used by thousands of teachers and consultants in 15 countries. Has conducted workshops and spoken about sustainable development in over 40 nations. Member of the Board of Directors, financial, software and alternative energy firms, Europe and the US. Author of 10 books on the environment, systems and energy, translated into 35 languages. Recipient of awards: four honorary doctorates; Fulbright Fellowship to the USSR (1989); Order of Honour from the President of Hungary (2006); Peace Prize, German Committee, UNESCO (2007); Japan Prize (2009).”

Undoubtedly, Dennis Lynn Meadows is one individual with the most impeccable and highly qualified credentials to push the Globalist agenda of the [United Nations](#), its strategic partner the [World Economic Forum](#) and his beloved [Club of Rome](#). And given your government’s [unquestionable and unwavering commitment](#) [Chapter 5] to the [Catastrophic Climate Change Scam \(CCCS\)](#), I’m sure you would concur.

Now, around late August to early September 2017, Dennis Meadows was invited by the [Club of Rome Dutch Association](#), to [come to the Netherlands](#) and be interviewed by the [Dutch YouTube Climate Catastrophist Channel; WeLoveEarth](#) at a location offered by the [Nyenrode Business University](#).

During this 43 minute interview, given in four 9 to 12 minute segments,² it was in the [fourth segment](#) from 1 minute and 14 seconds to 5 minutes, that Dennis Meadows said “the quiet part out loud!” Namely, that in the interest of fighting his and his ilk’s perceived and eminent climate catastrophe, **we must reduce our global population down to ONE ... or at the very least ... TWO billion people!!**

YES ... I repeat ... in his eyes ... we must reduce our global population down to ONE ... or at the very least ... TWO billion people!!

The screenshot shows a YouTube video player interface. The main video is titled "Dennis Meadows Interview p4/4 (A 'peaceful collapse' & many revolutions...)" and is from the channel "We Love Earth" (1.04K subscribers). The video has 67K views and was uploaded 7 years ago. The player shows a subtitle: "billion people maybe two billion depending on how much". The video is at 3:46 / 10:31. The right sidebar shows recommended videos, including "Dennis Meadows à l'ENS de Lyon : beyond the limits to..." (13K views, 2 years ago), "US hostage envoy PANNED for last ditch negotiation tactics..." (5.9K views, 4 hours ago), "The De-Population Bomb" (5.7M views, 2 years ago), "Interview with Dennis Meadows on 'Limits to Growth'" (17K views, 11 years ago), and "Steven Bannon: US shouldn't do a deal with Ukraine as..." (Sky News). The browser address bar shows "youtube.com/watch?v=Dbo6uvjBtZg".

And in the process, **[he hopes it can be implemented civilly ... or in a peaceful manner!](#)**

Hmmmm ... makes me think of the MAID – Medical Assistance In Dying program in Justin Trudeau’s Canada,³ where the government decides who and who is NOT worthy of life. To which, do you think the over-educated and pretentious self-important Globalist toady sycophant of an academic “expert”, bereft of all education in practical life experience, that is Dennis Lynn Meadows, have deemed say Marian Vagner in July 2022, at age 91, in accordance with it seems Melbourne’s Alfred Hospital, UNWORTHY of life?

Or, should Dennis Lynn Meadows, now at 82 years old, just nine years younger than Marian Vagner at the time of his death in July 2022, be the first to practice what he preaches, in order to curtail his [forthcoming fake crisis of Catastrophic Climate Change?](#)

And in my estimation, someone such as Marian Vagner, the very epitome of [COURAGE, TRUTH and FREEDOM](#), as exemplified in his risking of his life in supplying food to the Czestohowa (Chenstohova) Jewish Ghetto, and on [multiple occasions, facing the barrel of German Guns as a twelve year old boy](#), is 100 times over, more worthy of life than some pretentiously over-educated Globalist sycophant epitomising the [COWARDICE, LIES and TYRANNY](#) that have facilitated the [Globalist dystopia engulfing our world today](#).

I will close with two further points highlighting the bankruptcy of credibility that is the [CCCS](#). Firstly from the introductory paragraph of the introduction of Dennis Meadow’s 1972 book [The Limits to Growth, Dynamics of Growth in a Finite World](#).

“I do not wish to seem over dramatic, but I can only conclude from the Information that is available to me as Secretary-General, that the Members of the United Nations have perhaps ten years left in which to subordinate their ancient quarrels and launch a global partnership to curb the arms race, to improve the human environment, to defuse the population explosion, and to supply the required momentum to development efforts. If such a global partnership is not forged within the next decade, then I very much fear that the problems I have mentioned will have reached such staggering proportions that they will be beyond our capacity to control.”

U THANT, 1969
[Secretary-General of the United Nations 1961-1971](#)

Well, ten years after 1969 and seven years following the publishing of Dennis Meadow’s book [The Limits to Growth, Dynamics of Growth in a Finite World](#) in 1972, it was in 1979, that no such crisis as predicted by U Thant materialised. No less credibly bankrupt were the claims of population catastrophism as virulently espoused by the like minded screw or two loose death cultist [Paul Ralph Ehrlich](#) in his 1968 book [The Population Bomb](#). Four or so decades later, with none of its apocalyptic predictions coming true, he and his wife Anne felt compelled to write the paper; [The Population Bomb Revisited](#).

Secondly and finally, another rabid climate alarmist by the name of Al Gore, Democrat US presidential candidate in 2000, vice president in the Clinton administration from 1993-2001 and member of the World Economic Forum’s board of trustees,⁴ in his 2006 documentary [An Inconvenient Truth](#)⁵ made the climate alarmist friendly but erroneous assertion that rising CO₂ levels

cause rising temperatures – in spite of the Vostok ice core and Milankovitch cycle data clearly indicating the exact opposite.⁶ Nevertheless, and in spite of numerous other documented inaccuracies,⁷ in 2007, Al Gore was awarded the Nobel Peace Prize, along with the UN's Intergovernmental Panel on Climate Change, for “informing the world of the dangers posed by climate change”. As Patrick Moore stated: [I paraphrase]

“However, changes in orbit that alter the distance from the Sun along with changes of tilt could quite conceivably cause changes to the Earth's temperature regime. And a change in temperature in the atmosphere also means a change in temperature of the world's oceans causing them to absorb more CO₂ when they cool and to emit more CO₂ when they warm. Moreover, given that the oceans contain almost 50 times as much CO₂ as the atmosphere, just a one percent change in oceanic CO₂ results in a 50 percent change in atmospheric CO₂.”⁸

The film's distributor, Paramount, in typical Climate Catastrophist alarmism, warned in its 2006 synopsis of the film:

“Humanity is sitting on a ticking time bomb. If the vast majority of the world's scientists are right, we have just ten year's to avert a major catastrophe that could send our entire planet into a tail-spin of epic destruction involving extreme weather, floods, droughts, epidemics and killer heat waves beyond anything we have ever experienced.”⁹

By November 2012, Paramount removed this apocalyptic but embarrassingly erroneous synopsis!¹⁰ No problem! The good old WayBack Machine furnishes a November 27th, 2010 archived copy at https://web.archive.org/web/20101127132653/http://www.paramountpictures.co.uk/films/an_inconvenient_truth/index.asp!

Moreover, in 2007, a UK High Court judge ruled that Gore's *An Inconvenient Truth* contained nine key scientific errors. While not banning its screening in British schools, judge Michael Burton ruled that it could only be shown with guidance notes to prevent political indoctrination.¹¹ In 2025 however, the indoctrination of school students as to the so-called indisputable consensus of Catastrophic Climate Change, is ubiquitous. [To which my personalised mobile phone ringtone provides the requisite comic relief presentation of truth.](#)

And yet, the climate catastrophist clown Dennis Meadows, [claims that no less than population culling of billions is demanded in the name of his fake crisis.](#) A crisis which only exists in the minds of himself and his fellow ilk of pretentious self-important Globalist toadying sycophants of over-educated academic “experts”, bereft of all education in practical life experience.

To which, I wonder if you are comforted with Dennis Meadows' assurance of [“civil or peaceful” population culling](#)? If so, I shall leave you to consider the following exchange from the final months of Adolf Hitler's Reich in February to March 1945, as documented in Chapter 23 *Buchenwald* of my book [The Pastor and the Matriarch of the German Underground and Their Times – A Polish Perspective](#):

“At their first opportunity to speak at length, [SS Doctor] Sigmund Rascher [he fell out of favour with Hitler’s regime] told Sigismund Payne Best [British operative captured early in WWII] that he had been on Heinrich Himmler’s [[Head of the Gestapo and SS](#) and born on [October 7th 1900](#)] personal staff, and that it was he who had planned and supervised the construction of the gas chambers and was responsible for the use of prisoners as guinea pigs in medical research.¹² Rascher saw nothing wrong in this, and described it as mere expediency, as if it were nothing more sinister than performing a routine operation or experimenting on rats. **In regard to the gas chambers, he described Himmler as a “very kind-hearted man,” who was most anxious that prisoners be exterminated in a manner that caused them “least anxiety and suffering!”**¹³

Hence Mr. Chalmers, are you still disencumbered of any possible concerns by the assurances of Dennis Meadows of [“civil” or “peaceful” population mitigation?](#) And can Mr. “*Screw or two loose*” Meadows be as **“*humane*”** as [Heinrich Himmler](#) – born on [October 7th 1900?](#)

Yours Sincerely

[Vince Barwinski](#)

1 [Papers by multiple authors adapted from entries to the 1975 George and Cynthia Mitchell Prize and from presentations before the 1975 Alternatives to Growth Conference, held at the Woodlands, Texas.](#)
